DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 14 February 2006 has been entered.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 19 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rasche et al. (US Patent 6,619,840; hereinafter Rasche) in view of Sugihara et al. (US Patent 6,990,170; hereinafter Sugihara).

Rasche discloses, in figures 7 and 8A and throughout the disclosure, an imaging apparatus comprising:

 a generally O-shaped gantry (11a) having a radiation source (111) and a detector (112) operable to obtain images of an object (P) positioned inside the gantry; Application/Control Number: 10/645,322 Page 3

Art Unit: 2882

a support structure (11);

 a gantry positioning apparatus that translates the gantry to multiple positions in a direction substantially parallel to the central axis of the gantry (column 4, lines 12-13); and

 a processor (126) which receives imaging data from the detector obtained at multiple gantry positions, and combines the data to extend the field of view of the imaging system in the direction of gantry translation (column 5, lines 2-10).

However, Rasche fails to teach or fairly suggest the gantry positioning apparatus that secures the gantry to the supports structure in a cantilevered manner.

Sugihara discloses, in figures 1A,2,4A and throughout the disclosure, a generally O-shaped gantry (210,260) secured to a support (110) in a cantilevered manner (130), wherein the gantry is translated to multiple positions in a direction substantially parallel to the central axis of the gantry to produce imaging data from the multiple positions (column 4, lines 49-58 and column 5, lines 21-25).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to secure the gantry of Rasche in a cantilevered manner because it reduces the footprint of the device and improves access to the patient during imaging.

Allowable Subject Matter

Claims 1-18 and 20-47 are allowed over the prior art of record.

Art Unit: 2882

The following is a statement of reasons for the indication of allowable subject matter: as set forth in the previous office actions.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth Keaney whose telephone number is (571)272-2489. The examiner can normally be reached on Monday, Tuesday, Thursday, Friday 7:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ed Glick can be reached on (571)272-2490. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
